PROFILE

With over 4+ years of hands-on experience in Full Stack development, I've excelled in crafting web-based applications catering to both client/consumer and provider/resource ends. My expertise spans the spectrum from front-end to back-end development, ensuring seamless user experiences and robust functionality. I am committed to staying abreast of industry trends and emerging technologies.

TECHNICAL SKILLS

Frontend :- ReactJS, NextJS, JavaScript, TypeScript, Redux

Backend :- Nodejs(Express), TypeScript

Database :- MySQL, MongoDB, PostgreSQL

DevOps :- Docker, AWS

PROFESSIONAL EXPERIENCE

Lince Soft Solutions Private Limited

August 2023 - Present

Full Stack Developer (Remote)

Directed the end-to-end development of a cost-effective Microservice Architecture-based food delivery application, overseeing both client-side and server-side implementation. Leveraged cutting-edge technologies to ensure optimal performance and scalability. Played a pivotal role in architecting and implementing a robust, modular system, enhancing overall efficiency and user experience.

Waffle Bytes Private Limited

Mar 2021 - Aug 2023

Web Developer (MERN Stack)

Championed the design and execution of a streamlined business requirement-gathering process, resulting in a notable 15% reduction in project delivery time. Spearheaded the development and successful completion of three full-cycle projects, demonstrating proficiency in delivering robust solutions tailored to business needs

Eppeok Solution Private Limited

Dec 2019 - Feb 2021

Full Stack Developer

At the onset of my career, I specialized in crafting HTML templates utilizing the Bootstrap CSS library and dynamically integrating them with PHP framework, particularly CodeIgniter. My primary focus was on contributing to an E-commerce web application, where I honed my skills in front-end design and back-end development, facilitating seamless user experiences and robust functionality.

PROJECTS

Getlook.in

Tech Stack : (React JS, Node JS, Express JS, MongoDB, Google map API)

- Frontend development using React JS for creating interactive, intuitive, and responsive user interfaces.
- Backend created with node js and express js to handle API and MongoDB as Database management.
- For map location implemented Google map API.

Getezo.in

Tech Stack : (Next JS, Node JS, Express JS, MongoDB, WebSocket)

- Frontend development using Next js for seamless user Interface.
 - Backend implementation with node js and express js to handle API and database operations.
 - Database management utilizes MongoDB as a database to store and manage.
 - For real-time communion, implemented WebSoket(soket.io).
-

EDUCATION

Graduate B.tech

Delhi College of Technology and Managment
(2018)

Intermediate (10+2)

UP Board
(2013)
